High School Students! The Ninth Annual McMaster Brain Bee February 21, 2012

The **Brain Bee** is an exciting competition for high school students that inspires passion about the brain and neuroscience. You will learn about intelligence, memory, emotions, sensations, movement, stress, aging, sleep, addiction, and many other brain topics.

High schools students from the Hamilton-Halton-Niagara region (and surrounding area) are invited to compete in the 9th Annual McMaster Brain Bee, on February 21, 2012. Participation is a great way to **add to your resume**, and win great **prizes and trophies**.

Our champion will compete in the **CIHR Canadian National Brain Bee**, to be held on Saturday, May 26, 2012 (<http://brainbee.ca>). How exciting to compete for the National title, trophies, cash prizes (\$1500 for first prize, \$1000 and \$500 for 2nd and 3rd prizes) and a summer internship in a neuroscience laboratory for the 1st place winner!

The national winner will represent Canada at the International Brain Bee, to be held in Cape Town, South Africa in July 2012.

We look forward to seeing you in 2012!

For information about the McMaster Brain Bee and how to register and study, please check our website:
